PROFILE SUMMARY

Full Stack Developer with hands-on experience building and deploying production-level web applications using the MERN stack. Strong foundation in **Data Structures and Algorithms (DSA) using C++**, **Object-Oriented Programming**, RESTful API development, and database design with MongoDB and SQL. Experienced in building scalable applications, implementing secure authentication, and collaborating using Git-based workflows. Actively expanding expertise in Docker, System Design, AI API integration, and modern backend technologies.

EDUCATION

Chandigarh Group of Colleges, Jhanjeri <i>Bachelor of Technology, Computer Science and Engineering</i>	2024 – 2027 CGPA: 7.8
SVM Inter College, Shamli, Uttar Pradesh <i>Senior Secondary School (Class XII)</i>	2023 Percentage: 68.2%

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js
Backend: Node.js, Express.js
Database: MongoDB, Mongoose, Redis, SQL Database
OOP & Languages: Object-Oriented Programming, JavaScript, C++
Version Control: Git, GitHub
DevOps & Cloud: Docker, AWS (Lambda, API Gateway, EC2), CI/CD Pipelines, GitHub Actions
Concepts: Data Structures, Algorithms, Basic System Design, Debugging, Clean Code

PROJECTS

- GeniusPilot — AI Interview Preparation** | *React, Node.js, Express, MongoDB, Redis, OpenAI, Razorpay* | [GitHub](#)
- Built an AI-powered resume analyzer using the OpenAI API that compares resumes against job descriptions, generating match scores, skill-gap analysis, and personalized preparation roadmaps.
 - Implemented AI mock interviews with role-specific question generation, answer evaluation, and actionable feedback to help users improve interview performance.
 - Designed secure and scalable backend services with documented REST APIs, Redis-based rate limiting, JWT authentication, and Razorpay subscription/payment integration.
- AI Document Insights Platform** | *React.js, Node.js, Express.js, MongoDB, Redis, Pinecone, LangChain* | [GitHub](#)
- Developed a full-stack RAG (Retrieval-Augmented Generation) platform enabling PDF uploads, vector embedding generation, and context-aware question answering with AI-powered summaries.
 - Architected an asynchronous document processing pipeline using Redis, LangChain, HuggingFace embeddings, and Pinecone vector database for efficient document indexing and retrieval.

INTERNSHIPS

- Full Stack Developer Intern** 2025
SmartCampusERP (Unified Mentor Pvt. Ltd.)
- Built optimized backend APIs for academic management, implementing concurrent data aggregation pipelines and bulk-marking transactions for attendance, reducing faculty admin overhead.
 - Designed and implemented a custom regex-based API Shield validation layer to sanitize payloads, mitigating security vulnerabilities across all public-facing endpoints.
 - Integrated an automated notification system and notice board engine using role-aware MongoDB schemas to broadcast real-time updates to students, teachers, and admins.

CERTIFICATIONS

Full Stack Development – Unified Mentor
Front-End and Web Development – IBM
Database and SQL – Infosys Springboard
