PROFILE SUMMARY

MERN Stack Developer with hands-on experience building production-grade, real-time web applications. Skilled in REST API design with JWT authentication, Socket.IO-based real-time communication, and adaptive media streaming. Proficient in Data Structures and Algorithms using C++, with a strong foundation in scalable full-stack architecture and continuous drive to deliver efficient, user-focused solutions.

EXPERIENCE

Full Stack Web Development Intern

2024

Unified Mentor

Remote

- Completed a 2-month internship building real-world full-stack applications using the MERN stack.
- Demonstrated consistent performance across multiple project milestones, delivering functional and well-structured code.

EDUCATION

Chandigarh Group of Colleges, Jhanjeri

2024 – 2027

Bachelor of Technology, Computer Science and Engineering

CGPA: 8.39

S V M Inter College, Shamli, Uttar Pradesh

2023

Senior Secondary School (Class XII)

Percentage: 68.2%

PROJECTS

Retail Price Comparison Bot: Smart Local Price Tracking System | [GitHub](#)

- Built a MERN web platform that aggregates real-time product prices across nearby shops, reducing user price-discovery time through location-aware filtering and product price history tracking.
- Integrated a chatbot-assisted query system to help users identify the best local deals faster, with Socket.IO powering real-time updates.
- Engineered secure, modular REST APIs with JWT authentication, bcrypt hashing, role-based access control, and centralized middleware-based error handling.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, Mongoose, JWT, bcrypt, Axios, Socket.IO, Razorpay

visStream: Real-Time Adaptive Streaming Platform | [GitHub](#)

- Built a full-stack MERN application for synchronized video watch parties supporting host-controlled playback, room-based collaboration, and invite-driven participation for concurrent users.
- Implemented real-time communication using Socket.IO for synchronized play/pause/seek events, live chat, typing indicators, emoji reactions, and host handover logic.
- Engineered an FFmpeg-based media pipeline for video upload transcoding into adaptive HLS outputs (480p/720p/1080p), significantly reducing buffering for concurrent watch-party users via master playlist generation and progress tracking.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, Mongoose, JWT, Socket.IO, WebRTC, HLS.js, FFmpeg, Axios

SKILLS

Technical Skills: Html, Css, JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, Socket.IO, Mongoose, JWT, bcrypt, Git, GitHub

Core CS Concepts: Data Structures & Algorithms (C++), Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Computer Organization and Architecture

Soft Skills: Leadership, Problem Solving, Teamwork, Communication

TRAININGS & CERTIFICATIONS

Trainings

- Completed React.js training, developing reusable components and building dynamic, responsive user interfaces.
- Completed MongoDB training, gaining hands-on experience in NoSQL database design and schema modeling.

Certifications

- Full Stack Development — Unified Mentor
- Front-End and Web Development — IBM
- Database and SQL — Infosys
